Dear Permit Owner/Applicant:

Please be informed that **October 15th** is the deadline for implementing permanent erosion control measures on your project. Completed projects must have all soils disturbed by grading reseeded or hydro mulched by this date. In addition, all erosion control measures shall be maintained, repaired and kept in working order throughout the period of October 15th to May 15th.

Erosion control measures which will not be completed by October 15th or construction which will continue after this date requires a plan for temporary erosion control measures which must be submitted to this department no later than October 10th. Grading between October 15th and May 15th requires a supplementary permit to grade which must be signed by the owner or authorized agent prior to issuance. This permit will be issued after an erosion control plan has been received and approved by this department.

Please be advised that if erosion control measures are not met, this department may have the necessary work done and the cost assessed to the property owner in accordance with Section 12.20.080 of the Grading Ordinance. To help aid the inspection process, please notify this office when permanent erosion control measures have been implemented. The State Regional Water Quality Control Board may also have violation and fining authority over individual projects.

Your cooperation in this matter will be greatly appreciated. If you have any questions, please contact Richard York at (209) 533-5633.

Sincerely,

Richard S. York, Jr., R.C.E.
